DATE MAILED: 07/17/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/691,989 Examiner James Keenan	ARREZ ET AL. Art Unit 3993	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 03 May 2006.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 14-22 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 14-22 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date. _____.
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date _____.	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
	6) <input type="checkbox"/> Other: _____.

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 14-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Szinte in view of Antal, and further in view of Ahrens, Christenson, or Schreiber et al, all previously cited.

Szinte shows in figures 8-10 a grasper for inverting and dumping a refuse receptacle, comprising support 150 mounted to a lifter 106, first and second gripper arms 152a-b, and hydraulic actuator 154, wherein the gripper arms move between a first position in which they receive the refuse receptacle therebetween and a second position in which they lay generally flat against the support for storage, (see col. 14, line 46 to col. 15, line 3).

Szinte does not show the first arm to define an arm-receiving region between portions of which the second arm is received in or “nests” when in the second position.

Antal shows a grasper mounted to a lifter, comprising support 30, lifter 22, first and second gripper arms 27, 28, and hydraulic actuator 33, wherein the gripper arms move between a first position (fig. 3) in which they receive an article to be gripped therebetween and a second position in which they lay flat against the support for storage (fig. 4). Either gripper arm of Antal can be seen as having an arm-receiving region in which the other arm is located when in the second position.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have modified Szinte such that the arms nested together when stored, as

shown by Antal, as this would simply be an art recognized alternate equivalent means of compactly storing the arms.

However, Szinte as modified does not show the first gripper arm to define an arm-receiving region sized in which the second gripper arm nests.

Ahrens (fig. 2), Christenson (figs. 4-5), and Schreiber et al (figs. 4-5) all show refuse receptacle gripper arms in the same environment as Szinte which comprise a first arm consisting at least partially of two spaced members defining an opening or space therebetween in which a second arm at least partially nests.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have further modified the apparatus of Szinte such that the first arm thereof included two spaced members defining an opening in which the second arm could nest when in the second position, as shown by Ahrens, Christenson, or Schreiber et al, as this is a well known and desirable gripper arm configuration for refuse collecting vehicles.

Re claims 17-18, the features are shown substantially by Szinte. Although the arms define a continuous curve rather than a linear portion extending from the fixed end and an angled portion at the free end, the concept of having the free ends lay behind the plain of the support when in the second position to avoid obstructions is the same, and thus the particular shape of the arms is considered an obvious design expediency.

Re claim 22, the use of a rotary hydraulic actuator for rotating the lift arm structure is considered an obvious alternate equivalent design expediency.

Art Unit: 3993

3. Applicant's arguments filed 5/3/06 have been fully considered but they are not persuasive. Applicant argues that neither Szinte nor Antal disclose or suggest the features of new claims 14 and 22. However, these claims contain language similar in scope to former claims 3, 5, and 9-13, in which the additional reference to Christenson, Ahrens or Schreiber et al was applied. Thus applicant's arguments concerning only the Szinte and Antal references are not germane to the claims as currently presented.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Keenan whose telephone number is 571-272-6925. The examiner can normally be reached on (schedule varies).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen Lillis can be reached on 571-272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
